

MODULE 10 – PROTOCOL CRITERIA

COURSE UPDATES

Item 5: Case Studies

We have uploaded a case study into our trainee resources for you to review. The case study contains a copy of the client's intake form followed by our recommended protocol set out in an email to the client. You will use the same format of this case study for your assessment of the practical study with your client in Module 9. Modules 9 and 10 are inter-connected.

Case study no 2 document outlines the assessment criteria for use in the submission of both case studies and you utilise the Role Play "client" for number 1. Essentially this activity indicates to us that you can articulate / express your rationale behind each element of the protocol ie: what and why. It also shows your ability to read an intake form correctly and prepare for a consultation accordingly.

ADDITIONAL RESOURCES

Cannabis and Cancer Practitioner Guide

We have recently created suggested guidelines and recommendations for the treatment of clients with cancer. Please note that this document is a guide only. Recommendations and Protocols may change depending on the individual client's circumstances.

9 Day, 24 Day Programs and End of Life Protocol Video

We would like to offer share with you a recording of my discussion with one of our fellow trainees in relation to the 9 day program, 24 day program and end of life protocols. This discussion has some really valuable information which you will find useful in relation to implementing these programs. You will find the video in our resources section here
