

## MODULE 6 – IN HOUSE PRODUCTS

### COURSE UPDATES

#### Item 5: Body Products and Supplements

There is one particular supplement that we have recently introduced in our recommendations to clients that falls outside of our standard cannabis and herbal products. This oil is called Carbon C60. C60 is incorporated in ALL of our cancer protocols and widely used in various other protocols. It is a phenomenal product and when used alongside cannabis it really can be a game changer. We encourage you to watch one of our training videos by Emma Cohen where she explains the molecular structure of Carbon C60 and the effects it has in the body. We have also uploaded a document on C60 into this section and you can find the pdf [here](#)

#### Item 6: Contraindications

In the introduction to Contraindications video, it is mentioned that we use a list of pharmaceuticals in our Best Practice system to assess any possible contraindications with cannabis. We have since found a great website that advises all contraindications and the level of risk each pharmaceutical drug has with cannabis. If you register to this website you are able to type in several different medications at once. If you are not registered you will have to search the medications separately. A link to the website is provided here for your future use and reference: [Drugs.com](https://www.drugs.com)

#### Item 7: Portal Distribution

As with everything, our Portal.Life system is ever evolving. We've have some recent changes to processes regarding the client's initial order and to how clients are registered with a Practitioner or their company. The client now places their own initial order (and all subsequent orders) via theportal.life shop, not the Practitioner. Instructions on 'How to Order Products Online' can be emailed along with the recommended protocol after the initial consultation, or the client can be directed to this document in the Client Resource section. You will find a copy of the 'How to Order Online' document [here](#)

**Once you are a Certified, and wish to be an Independent Practitioner, you will be part of our sustainability / affiliate system. You (or your company) will be registered in ThePortal.Life and a unique link will be generated for use by your clients for ordering, and to establish your own record keeping system. This is a sustainable model which means you will be remunerated and supported on all levels. This aspect is discussed further in Module 11 or speak to one of the Practitioner Support team.**
